

About Company

At Eunoia Innovations, we believe in harnessing the boundless possibilities of the ocean. Our mission is to redefine maritime exploration and operations using state-of-the-art robotic solutions. Bridging the gap between technology and the deep blue, we aim to create a world where marine tasks are safer, efficient, and more sustainable.

EUNOIA INNOVATIONS

**Clean Water,
Clear Future !**

About Our Product

AquaSkimmer

Introducing Aqua Skimmer, Your Solution to Cleaner Waters. Our cutting-edge maritime robotics technology autonomously removes surface trash, revolutionizing water cleaning efforts and safeguarding aquatic ecosystems worldwide. Experience efficiency and sustainability with Aqua Skimmer.

Equipped with advanced sensors, Aqua Skimmer not only removes surface trash but also monitors water quality in real-time, ensuring comprehensive environmental protection and sustainability.

Our Best Services

We take up challenging marine environmental projects which involve automation and innovation with unmanned devices.

Cleanup Projects

Collection of surface trash and monitoring water quality using Aqua Skimmer.

Marine Survey

Marine ecosystem survey and water quality monitoring with data acquisition.

Innovation

Exploration and R&D on surface and sub-surface unmanned vessels and product innovation

Our Partnerships and Associations

Dimensions
1750 x 1425 x 1200 MM

Capacity
75 Kg

Range
5 KM

Runtime
6-8 hrs
